As with any
good camera, I
should start by
talking about the
image quality of
the **Sony a7 IV**

Autofocus was
quick and
responsive while
photographing
using the rear
LCD

First and foremost,
high-end camera
equipment is **made
with high-quality
materials and
technology**, which
reflects in its price.

Adds the
function to
use Picture
Effectmodes.

Enables the use of
wireless High-
Speed
Synchronization
with applicable
external flash units.

Adds a digital level
gauge function
when using an
optional external
monitor such as the
CLM-V55Clip-on
LCD Monitor.

The Sony a7cR is a
pretty awesome
camera if you're not
doing serious work
with it. But I truly
wish Sony hadn't
limited it so

Sony's refreshed
ZV-1M2 camera
records up to
4K30p and makes
for amazing footage
with the touch of a
button.

The Sony A6700
camera was
compared to Canon
and Fujifilm rivals.
